

AutoCAD Transitioning from the Previous Release Course

Overview

This course provides previous release software users a thorough understanding of the new and enhanced features offered in the current product. Students learn how to significantly improve 2D drafting productivity by using the new 2D Drafting and Annotations workspace, Dashboard and CUI. Also, they learn how to increase productivity with the new drawing annotation functionality including annotation scales, Multi-leaders, and dimensioning enhancements. Also covered are enhancements to how table data can be created from Excel spreadsheets, including linked data to Excel and Comma Delimited files. Finally, students learn how to create even more photorealistic visualizations with advanced light sources.

Duration

1 Day (9:30am – 4:30pm) demonstration & practical exercises.

Prerequisites

This courseware is designed for the current AutoCAD user who is upgrading to latest release from the previous release.

Syllabus

User Interface Enhancements

User Interface

Drawing Annotation

Introduction to Annotation Scaling

Controlling Annotation Scale

Using Multileaders

Working with Text

Dimensioning

Table Data

Data Extraction

Visualise Enhancements

Visualisation
